In presenting this New Edition of the Missouri Harmony to the public, the publishers take the privilege of saying a few words in its favor. It has been long known to possess the merit of having the largest collection of what may be termed the old melodies, and which are identified with our most hallowed emotions, and which are undoubtedly more suited to solemn worship than perhaps any other selection. It also abounds with the most beautiful of the more modern compositions, making it altogether one of the best works for the use of Congregations or Choirs now in use.

The old edition of this work, having several errors in the harmony, and the high esteem in which it has been held on account of its possessing more of the primitive tunes than any other work of the same size, induced the publishers to have it revised and corrected; which has been done by Mr. CHARLES WARREN, a gentleman well known as a teacher and scientific musician, and they now confidently recommend it to the musical public, and particularly to Churches, and Singing Societies.

In making the present arrangement, the reviser has abandoned the use of the alto or C clef, which was used in the former edition, and substituted the  for the same part, for the reason that the G clef is more generally known and practiced in works of this kind, and the same part G  can also be sung by a second treble voice. Also, in the old edition, the uniformity which is requisite in a work of this kind was not clef,  carried through—the alto, in the third part of the work, being placed on the upper staff of the tunes. In the present arrangement, the uniformity required is carried through the work, viz: the top staff for the tenor voice, the second staff for the alto part, the third staff for treble, and the lower staff for the bass voice. The introductory part, or Rudiments of Music, remain as in the former edition; and the publishers now confidently recommend it to the public, as one of the best works for public worship or private societies, that they are acquainted with.

**Bass Staff.**

**Tenor Staff.**

**Treble Staff.**

The foregoing scale comprises three octaves or 22 sounds. The F clef used on the fourth line in the Bass, shows that that line is the 7th sound in the general [ scale.

The G clef used on the second line in the tenor and treble, shows that that line, in the tenor, is the 8th sound in the general scale, and in the treble (when performed by a female voice) the 15th sound; for if the treble, as well as the tenor, were performed entirely by men, the general scale would comprise only 15 sounds; hence the treble staff is only raised an octave above that of the tenor, in consequence that female voices are naturally an octave above men's, and to females the treble is usually assigned. The stars (\*) show the natural places of the semitones.

When the C clef is used, (though it has now become very common to write counter on either the G or F clefs) the middle line in the counter is in unison with the third space in tenor, (C) and a seventh above the middle line in the bass, &c

# GROUNDS OF MUSIC.

Three octaves being more than any common voice can perform, the bass is assigned to the gravest of men's voices—the tenor to the highest of men's, and the treble to the female voices; the counter (when used) to boys', and the gravest of the female voices.

Two sounds equally high, or equally low, however unequal in their force, are said to be in unison, one with the other. Consequently E on the lower line in the treble staff, is in unison with E on the fourth space in the tenor; and E on the third space in bass, is in unison with E on the first line of the tenor, and an octave below E the lower line in the treble. See the General Scale. From any one letter in the General Scale, to another of the same name, the interval is an octave—as from B to B, D to D, &c.

Agreeably to the F and G clefs used in the General Scale, a note on any line or space in the bass, is a sixth below a note on a corresponding line or space in the tenor, and a thirteenth below a note in the treble occupying the same line or space, (when the treble is performed by females). See the General Scale. Suppose we place a note on D, middle line of the bass, another on B, the middle line of the tenor or treble, the interval will appear as just stated; and to find any other interval, count either ascending, or descending, as the case may be.

TREBLE.	C	D	B	A	G	F	E	E	C	A
AIR.	C	D	B	A	G	F	E	E	C	A
BASS.	C	D	D	D	D	D	D	E	C	A

Octave.	Ditto.	6th.	5th.	4th.	3d.	2nd.	Unison.	Oct.	Double Octave
---------	--------	------	------	------	-----	------	---------	------	---------------

In counting intervals, remember to include both notes or letters—thus in counting a sixth, in the above example, D, is one, E is two, F is three, G is four, A five, and B six.

In the above example, the notes in the treble and air, are placed in unison with each other. But assigning the treble to female voices, and the air to men's voices, (as is customary,) an octave must be added to the notes in the treble, (as previously observed of a woman's voice being an octave more acute than a man's) the interval then being the bass and treble—in the first bar, would be a fifteenth or double octave; in the third bar, the note on B in the treble, a thirteenth above D in the bass, &c. Observe that an octave and a second make a ninth; an octave and a third make a tenth; an octave and a fourth make an eleventh; an octave and a fifth, a twelfth; an octave and a sixth, a thirteenth; an octave and a seventh a fourteenth; two octaves a fifteenth, &c., always including both the first and last note.

When a leger line is added to a treble staff, a note occupying it is said to be in ALT; and when the notes descend below the bass staff, they are termed DOUBLES.

# INTRODUCTION TO THE

## TERMS BY WHICH THE DIFFERENT INTERVALS IN THE GAMUT ARE DENOMINATED.

1. An interval composed of a tone and a semitone, as from B to D, is called a Minor Third.

2. An interval composed of two full tones, as from faw to law, is called a Third Major.

3. An interval composed of two full tones and a semitone, as from mi to law, *i. e.* from B to E, is called a Fourth.

4. An interval composed of three full tones, as from faw to mi, *i. e.* from F to B, is called a triton, or Fourth redundant.

5. An interval composed of three tones and a semitone, as from faw to sol, *i. e.* from C to G, or from G to D, is called a Fifth.

6. An interval composed of three tones and two semitones as from law to faw, *i. e.* from E to C, is called a Sixth, Minor.

7. An interval composed of four tones and a semitone, as from faw to law, *i. e.* from C to A, is called a Sixth Major.

8. An interval composed of four tones and two semitones, as from sol to faw, *i. e.* from D to C, is called a Seventh Minor. *See next example.*

9. An interval composed of five tones and a semitone as from faw to mi, *i. e.* from C to B, is called a Seventh Major.

10. An interval composed of five tones and two semitones, is called an octave (as has already been observed).

See examples of the three last mentioned intervals.

The preceding intervals are counted ascending, or upward, and the sharp (#) indicates the places and number of semitones in each.

Note.—The semitones always lie between mi and faw, and law and faw.

OF HARMONY.

ON THE KEY NOTES IN MUSIC.

Having given an explanation of the different intervals contained in the octave, and the manner in which the parts of music are connected, I proceed to show how they may be used in composition to produce harmony.

Harmony consists in the proportion of the distance of two, three, or four sounds, performed at the same time, and mingling in a most pleasing manner to the ear.

The notes which produce harmony, when sounded together, are called *concord*s, and their intervals, *consonant intervals*. The notes which, when sounded together, produce a disagreeable sound to the ear, are called *discord*s, and their intervals, *dissonant intervals*. There are but four concords in music—viz: *unison*, *third*, *fifth* and *sixth*; (their eights or octaves are also meant.) The unison is called a perfect chord, and commonly the fifth is so called; if the composer please, however, he may make the fifth imperfect, when composing more than two parts. The third and sixth are called imperfect, their chords being not so full, nor so agreeable to the ear, as the perfect; but in four parts, the sixth is often used instead of the fifth: so in effect there are but three concords, employed together, in composition.

N. B. The meaning of imperfect, signifies that it wants a semitone of its perfection, to what it does when it is perfect: for as the lesser or imperfect third includes but three half tones, the greater or major third includes four, &c. The discords are a *second*, a *fourth*, a *seventh*, and their octaves; though the greater fourth sometimes comes very near to the sound of an imperfect chord, it being the same in ratio as the minor fifth. Indeed some composers (the writer of these extracts is one of them) seem very partial to the greater fourth, and frequently admit it in composition. The following is an example of the several concords and discords, and their octaves under them:

	CONCORDS.				DISCORDS.		
Single Chords.	1	3	5	6	2	4	7
	8	10	12	13	9	11	14
Their Octaves.	15	17	19	20	16	18	21
	22	24	26	27	23	25	28

Notwithstanding the 2d, 4th, 7th, 9th, &c., produce properly discords, yet they may sometimes be used to advantage, where more than two parts of the same piece of music are written. I would offer as a bare opinion, the following rule for the admission of dissonant sounds:—Where there are two full chords for one discord, they may be admitted, provided a full chord of all the parts immediately follow; “they will then answer a similar purpose to *acid*, which being tasted immediately previous to *sweet*, gives the latter a most pleasing flavor.”

In music there are only two natural or primitive keys—one of which is cheerful, and called *sharp*; the other melancholy, and called *flat*. C is called the sharp key, and A the flat key. Without the aid of flats and sharps placed at the beginning of staves, which transpose B (*mi*), the center and governing note, and consequently the keys, no tune can rightly be formed on any other than natural keys. Flats and sharps placed at the beginning of staves, produce what are called artificial keys, and bring the same effect (*i. e.* place the two semitones of the octave the same distance from the key note), as the two natural keys. The reason why the two natural keys are transposed, and flats and sharps placed at the beginning of staves, is to bring them within the stave and within the compass of the voice. The key notes, or places of the keys, are always found in the last note of the bass, of a correct tune; and is either *faw* immediately above *me*, sharp key—or *law* immediately below *mi*, flat key. The reason why one tune is on a sharp lively key, and another on a flat melancholy one, is, that every third, sixth and seventh, ascending from the sharp key, are half a tone higher than the same intervals ascending from the flat key note. (See the example.)

EXAMPLE OF THE KEYS.

In the Major key, from *faw* to *law*, its 3d, the interval is two tones, (a Major third)—from *faw* to *law*, its sixth, the interval is four tones and a semitone (a Major sixth), and from *faw* to *mi*, its seventh, the interval is five tones and a semitone (a Major seventh.)

MAJOR KEY. MINOR KEY.

6th, 7th, 7th, 8th.

In the Minor key, from *law* to *faw*, its 3d, the interval is one tone and a semitone, (Minor third)—from *law* to *faw*, its 6th, the interval is three tones and two semitones, (a Minor sixth), and from *law* to *sol*, its 7th, the interval is four tones and two semi-tones (a Minor seventh).

3d, A 3d.

To prove the utility of removing the key, I will produce one example. Let the tune “*Suffield*” be written on key note A (natural flat key), instead of E, its proper key—and, besides the inconvenience of multiplying ledger lines, few voices would be able to perform it—the treble in particular.

# INTRODUCTION TO THE

SUFFIELD—on E, its proper key, from the repeat.

This musical score is for the piece 'Suffield' in E major, 4/4 time. It consists of three staves: a treble clef staff, a second treble clef staff, and a bass clef staff. The key signature is one sharp (F#). The music begins with a repeat sign. The first staff contains a melodic line with eighth and sixteenth notes. The second staff contains a similar melodic line. The third staff contains a bass line with quarter and eighth notes. The piece concludes with a double bar line and a repeat sign. There are first and second endings indicated by '1' and '2' above the final measures.

The same on A, the assumed key.

This musical score is for the piece 'Suffield' in A major, 4/4 time. It consists of three staves: a treble clef staff, a second treble clef staff, and a bass clef staff. The key signature is two sharps (F# and C#). The music begins with a repeat sign. The first staff contains a melodic line with eighth and sixteenth notes. The second staff contains a similar melodic line. The third staff contains a bass line with quarter and eighth notes. The piece concludes with a double bar line and a repeat sign. There are first and second endings indicated by '1' and '2' above the final measures.

The *mi*, and consequently the *keys*, is removed either by sharpening its fifth or flattening its fourth, thus:

BY SHARPS.	1.	A fifth from B <i>mi</i> , its natural place, will bring us to	F
	2.	A fifth from F <i>mi</i> , will bring us to	C
	3.	A fifth from C <i>mi</i> , will bring us to	G
	4.	A fifth from G <i>mi</i> , will bring us to	D
	5.	A fifth from D <i>mi</i> , will bring us to	A
	6.	A fifth from A <i>mi</i> , will bring us to	E
	7.	A fifth from E <i>mi</i> , will bring us back to	B
BY FLATS.	1.	A fourth from B <i>mi</i> , will bring us to	E
	2.	A fourth from E <i>mi</i> , will bring us to	A
	3.	A fourth from A <i>mi</i> , will bring us to	D
	4.	A fourth from D <i>mi</i> , will bring us to	G
	5.	A fourth from G <i>mi</i> , will bring us to	C
	6.	A fourth from C <i>mi</i> , will bring us to	F
	7.	A fourth from F <i>mi</i> , will bring us home to	B

This accounts for the customary rules of transposition, viz:

The natural place for <i>mi</i> is	- - - - -	B
If B is $\flat$ , <i>mi</i> is on	- - - - -	E
If B and E are $\flat$ , <i>mi</i> is on	- - - - -	A
If B, E, and A are $\flat$ , <i>mi</i> is on	- - - - -	D
If B, E, A, and D are $\flat$ , <i>mi</i> is on	- - - - -	G
If B, E, A, D, and G are $\flat$ , <i>mi</i> is on	- - - - -	C
If B, E, A, D, G, and C are $\flat$ , <i>mi</i> is on	- - - - -	F
If F be $\sharp$ , <i>mi</i> is on	- - - - -	F
If F, and C be $\sharp$ , <i>mi</i> is on	- - - - -	C
If F, C, and G be $\sharp$ , <i>mi</i> is on	- - - - -	G
If F, C, G, and D be $\sharp$ , <i>mi</i> is on	- - - - -	D
If F, C, G, D, and A be $\sharp$ , <i>mi</i> is on	- - - - -	A
If F, C, G, D, A, and E be $\sharp$ , <i>mi</i> is on	- - - - -	F

DICTIONARY OF MUSICAL TERMS.

- Adagio*, signifies the slowest time.
- Air*, the leading part.
- Allegro*, brisk—quick.
- Allegretto*, not as quick as *Allegro*.
- Andante*, rather slow and distinct.
- Affetuoso*, tenderly and affectionately.
- Ad libitum*, or *Ad lib.*, at the pleasure of the performer.
- Alto*, the Counter.
- Anthem*, a composition of several parts, generally set to sacred prose.
- Chorus*, signifies that all the *voices* sing on their respective parts.
- Crescendo*, or *Cres.*, to increase the sound gradually till the strain is ended.
- Diminuendo*, or *Dim.*, to diminish the sound, directly the reverse of *Crescendo*.
- Duetto*, or *Duett*, or *Duo.*, a composition in two parts, one voice or instrument, only, on each.
- Da Capo*, or *D. C.*, to return and end with the first strain.
- Expressivo*, with expression.
- Forte*. or *For.*, or *F.*, loud.
- Fortissimo*, or *Fortis.*, or *F. F.*, very loud and strong.
- Finale*, or *Fine.*, the last movement of a piece of music.
- Fuge*, a piece in which one or more parts lead, and the rest follow at regular intervals.
- Grave*, in a solemn, manner slower than *Largo*, but not as slow as *Adagio*.

- Grazioso*, a smooth, flowing, and graceful style.
- Largo*, *Lentemento*, or *Lento.*, very slow.
- Larghetto*, not as slow as *Largo*, &c.
- Maestoso*, with strength and majesty.
- Mezza For.*, moderately loud.
- Mezza Pia.*, rather soft.
- Piano*, or *Pia.*, soft.
- Pianissimo*, or *P. P.*, very soft.
- Pastorale*, in a tender, soothing, and delicate style.
- Quartetto*, a piece in four parts—one voice or instrument on each.
- Quintetto*, five parts—one voice or instrument on each.
- Solo*, a piece of music for one voice or instrument.
- Spiritoso*, or *Con Spirito*, with spirit.
- Stacato*, notes stacatoed must be performed very short and bold.
- Symphony*, or *Sym.*, a passage for instruments only.
- Tempo*, the regular time.
- Trio*, music in three parts—one voice or instrument on each.
- Verse*, one voice to a part.
- Vigorouso*, with strength and energy.
- Vivace*, brisk and animated.
- Volti*, turn over.
- Volti Subito*, turn over quick.

## GENERAL OBSERVATIONS.

Obs. 1. Care should be taken that all the parts (when singing together) begin upon their proper pitch. If they are too high, difficulty in the performance, and perhaps discords will be the consequence; if too low, dullness and languor. If the parts are not united by their corresponding degrees, the whole piece may be run into confusion and jargon before it ends, and perhaps the whole occasioned by an error in the pitch of one or more parts, of only one semitone.

2. Each one should sing so soft, as not to drown the teacher's voice; and each part so soft, as will permit the other parts to be distinctly heard. If the teacher's voice cannot be heard, it cannot be imitated; and if the singers of any one part are so loud that they cannot hear the other parts because of their own noise, the parts are surely not rightly proportioned, and ought to be altered.

3. The bass should be sounded full and bold; the tenor regular and distinct; the counter clear and plain, and the treble soft and mild, but not faint. The tenor and treble may consider the German flute, the sound of which they may endeavor to imitate if they wish to improve the voice.

4. The high notes, quick notes, and slurred notes, of each part, should be performed softer than the low notes, long notes, and single notes of the same parts.

5. Learners should sing all parts somewhat softer than their leaders do, as it tends to cultivate the voice, and give an opportunity of following in a piece with which they are not well acquainted; but a good voice may be soon injured by singing too loud.

6. All the notes included by one slur, should be sung at one breath if possible.

7. All notes (except some in syncopation) should be fairly articulated; and in applying the words, great care should be taken that they be properly pronounced, and not torn in pieces between the teeth. Let the mouth be freely opened, the sound come from the lungs,\* and not be entirely formed where they should be only

distinguished, viz: on the end of the tongue. The superiority of vocal to instrumental music is, that while one only pleases the ear, the other informs the understanding.

8. When notes of the tenor fall below those of the bass in sound, the tenor should be sounded full and strong and the bass soft.

9. There are but few long notes in any tune, but what might be swelled with propriety. The swell is one of the greatest ornaments to vocal music, if rightly performed. All long notes of the bass should be swelled, if the other parts are singing short or quick notes at the same time. The swell should be struck plain upon the first part of the note, increase to the middle, and then decrease or die away like the sound of a bell.

10. The common method of beating the two first modes of common time is as follows: for the first beat, bring down the end of the fingers to whatever is used for beating upon; for the second bring down the heel of the hand; for the third, raise the hand a few inches; and for the fourth, raise the hand up nearly as high as the shoulder, in readiness for the next measure.

For the triple time mood, let the two first be the same as the two first of common time: and for the third, raise the hand a little higher than for the third beat of common time, when it will be in readiness for the next measure.

For the third and fourth moods of common time, and the two moods of compound time, there is just one motion down and one up for each measure; with this difference, for the common time moods there is no resting for the hand; but in compound time, the resting is double the length of the motion.

11. Learners should beat by a pendulum, or by counting seconds, until they can beat regular time, before they attempt to beat and sing both at once: because it perplexes them to beat, name, and time the notes all at once, until they have acquired a knowledge of each by itself.

about one fourth of an inch in diameter, and possesses power sufficient to divide a note or tone of music into one hundred equal parts.

\* The organ of a man's voice (or the lungs) is in form somewhat like a tube,

12. While first learning a tune, it may be sung somewhat slower than the mood of time requires, until the notes can be named, and truly sounded without looking on the book.

13. Some teachers are in the habit of singing too long with their pupils. It is better to sing but six or eight tunes at one time, and inform the learners concerning the nature and disposition of the pieces, and the manner in which they should be performed, and continue at them until they are understood, than to skim over forty or fifty in one evening, and at the end of a quarter of schooling, perhaps few, besides the teacher, know a flat-keyed piece from a sharp-keyed one; what part of the anthems, &c., requires an emphasis; or how to give the pitch of any tune which they have been learning, unless some person informs them. It is easy to name the notes of the piece, but it requires attention and practice to sing one.

14. Too long singing at one time, injures the lungs.†

15. I have found by experience, that learners will soon know when to sing soft and when strong, if they are led, by the teacher making a larger motion in beating where emphatical words or notes occur, than where others do.

16. Learners are apt to give the first note, where a fuge begins, nearly, double the time it ought to have; sounding a crotchet almost as long as a minim, in any other part of the tune; which puts the parts in confusion, by losing time, whereas the fuges ought to be moved off lively, the time decreasing (or the notes sung quicker) and the sound increasing as the notes fall in.

17. When notes occur one directly above the other (called choosing notes) and there are several singers to the part where they are, let two sing the lower note while one does the upper note, and in the same proportion to any other number.

18. Flat-keyed tunes should be sung softer than the sharp-keyed ones, and may be proportioned with a lighter bass; but for sharp-keyed tunes let the bass be full and strong.

19. Thirds should not be trilled or turned, lest they become seconds or discords, (though some authors do not confine their compositions to these rules), nor fifths and eights move together, ascending or descending, lest the parts seem but one.

20. In  $\begin{array}{c} \overline{233} \\ \overline{424} \end{array}$  and  $\begin{array}{c} \overline{3} \\ \overline{8} \end{array}$  the second accent is in common very weak, and in

† A cold or cough, all kinds of spiritous liquors, violent exercise, bile upon the stomach, long fasting, the veins overcharged with impure blood, &c. &c., are destructive to the voice of one who is much in the habit of singing. A frequent use of spiritous liquors will speedily ruin the best voice.

A frequent use of some acid drink, such as purified cider, elixir of vitriol with water, vinegar, &c., if used sparingly, are strengthening to the lungs.

quick time scarcely discernable, except in some particular pieces of poetry to which they are applied.

21. Learners should not be confined too long to "the parts that suit their voices, best," but should try occasionally the different parts, as it will tend greatly to improve the voice, and give the person a knowledge of the connection of the counter-parts, or of harmony as well as melody.

22. Learners should understand the tune well by note, before they attempt to sing them to verses of poetry.

23. If different verses are applied to a piece of music while learning, it will give the learner a more complete knowledge of the tune, than can be had by confining it always to the same set of words.\*

24. Your singers should not join in concert, until each can sing their own part correctly.

25. There should not be any noise indulged while singing (except the music), as it destroys entirely the beauty of harmony, and renders the performance (especially to learners) very difficult: and if it is designedly promoted, is nothing less than a proof of disrespect in the singers to the exercise, to themselves who occasion it, and to the Author of our existence.

26. When the key is transposed, there are flats or sharps placed under each stave: and when the mood of time is changed, the requisite character is placed upon the stave.

27. B, E, and A are naturally sharp sounds, and are therefore first flatted; and as F, C and G are naturally flat sounds, they are the first sharped.

28. The appoggiatura is placed in some tunes; it may be used with propriety by a good voice, but neither it nor the trill should be attempted by anyone, until they can perform the tune well by plain notes; (as this adds nothing to the time). Indeed no one can add much to the beauty of a piece by using what are called 'graces' unless they be in a manner natural to their voice.

29. There are other characters sometimes used by some authors, as a shake, a relish, &c., but I have reasons for omitting them in this place.

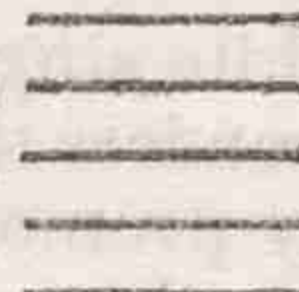

30. All "affectation" should be banished. It is disgusting in the performance of sacred music, and contrary to that solemnity which should accompany an exercise so near akin to that which will through all eternity engage the attention of those who walk in "climes of bliss."

31. The great Jehovah, who implanted in our nature the noble faculty of vocal performance, is jealous of the use to which we apply our talents in that particular, lest we exercise them in a way which does not tend to glorify his name.

\* And likewise applying different tunes to the same words, will have a great tendency to remove the embarrassment created by considering every short tune as a "set piece."

RUDIMENTS OF MUSIC.\*

Q. On what is music written ?

A. On five parallel lines  including the spaces between them, and those immediately above and below them, called a staff, calculated to express the degrees or gradations of sound.

Q. Are there not a certain number of sounds belonging to every keynote in music ?

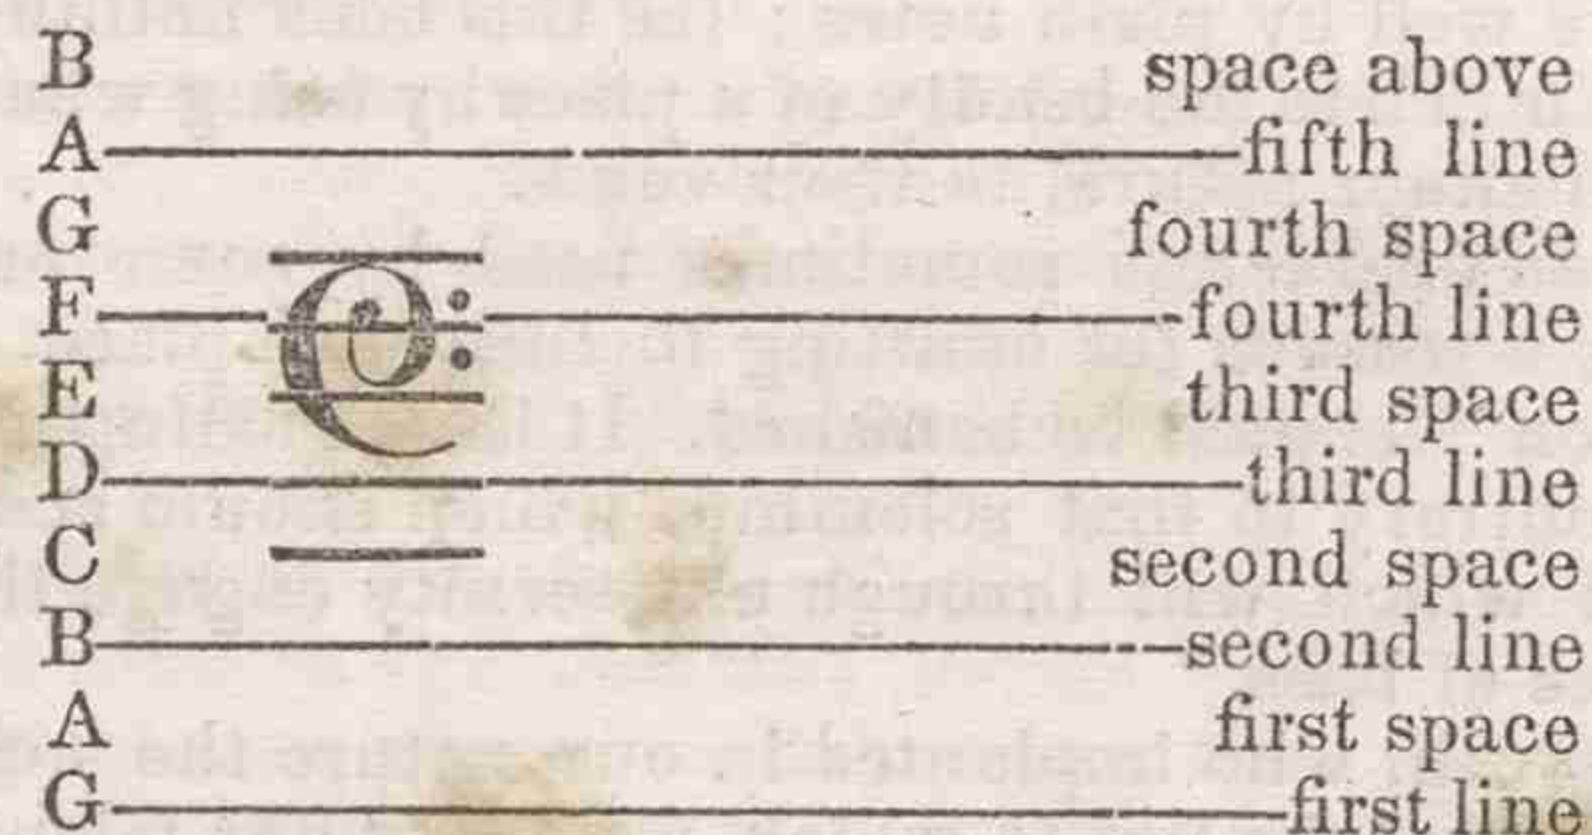

A. Yes, there are seven, which are expressed by the seven first letters of the alphabet, A, B, C, D, E, F, G.

Q. How many parts belong to vocal music ?

A. Four: Treble, Counter, Tenor, and Bass.

Q. How are the seven musical letters placed on the bass staff ?

A. Thus:

\* As this volume is designed principally for a book of instruction, to be used in schools, the following rules thrown into catechetical order, are intended for mere beginners in music,—the more advanced scholar will find the preceding introduction as still more worthy his study and attention. The compiler here acknowledges

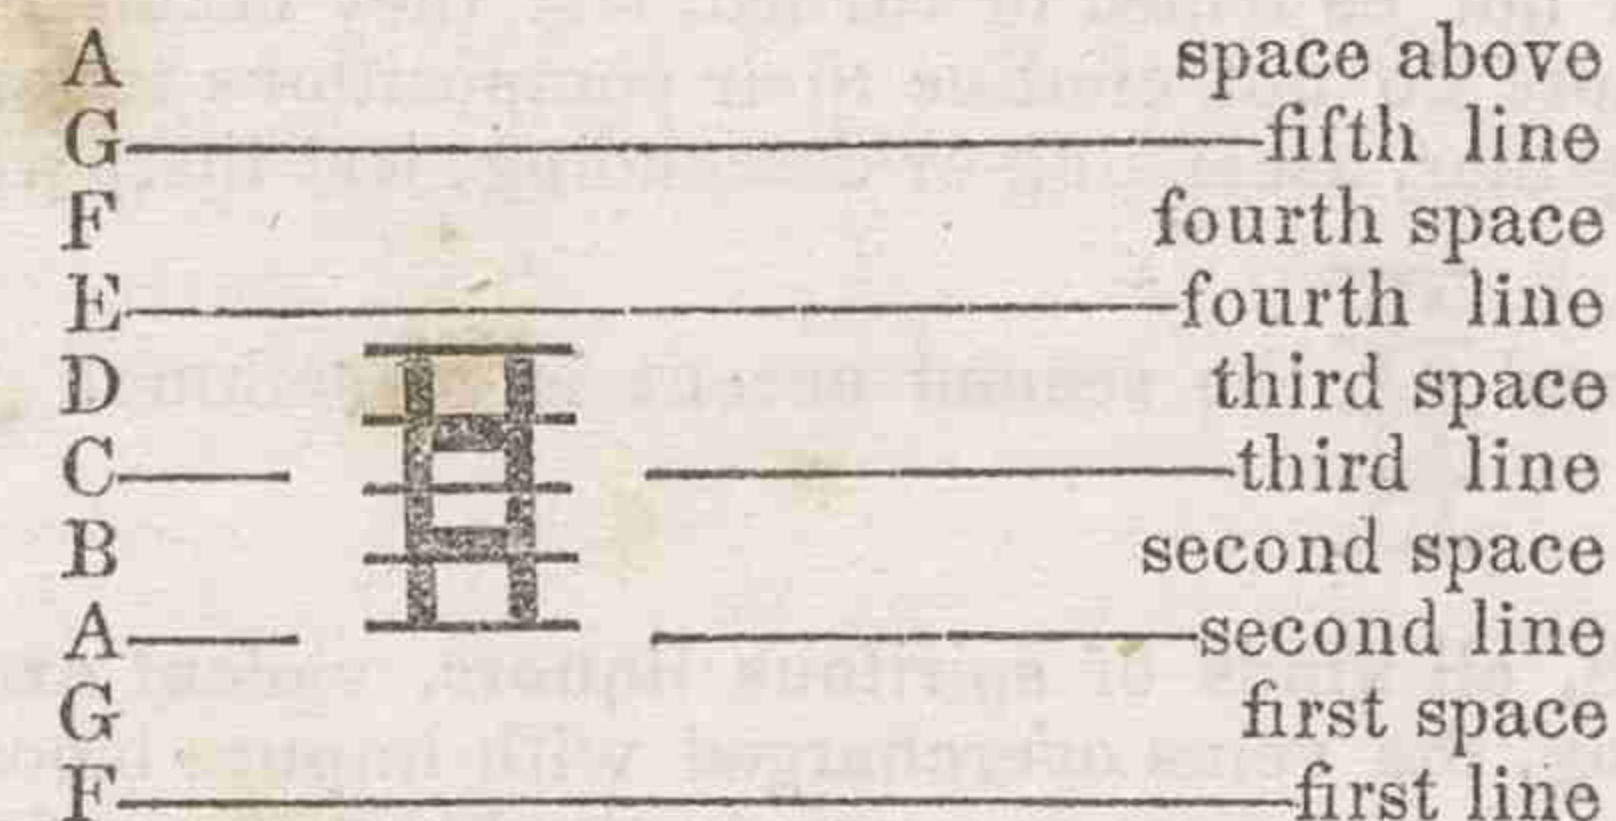

Q. How are they placed on the tenor and treble staff ?

A. Thus:

Q. How are they on the counter staff ?

A. Thus:

himself indebted to Mr. "Wyeth's Repository, part second," for many of the rules and remarks contained in this introduction.

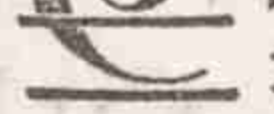

Q. What have you observed respecting this order of the letters on the staves for all the parts generally?

A. That the order of the letters is the same, though different on the same lines and spaces; for whenever, for instance, G is found, A is next, B next, and so on until the whole seven letters occur, and then on the eighth place the same letter occurs again. This eighth place is called an octave, and is considered a unison, or the same sound with the first—so that we may conclude that the whole of music is comprised in seven sounds.

Q. What are clefs?

A. They are musical characters placed at the beginning of every staff, and determine the order of the musical letters on that staff, and generally the part of music written thereon.

Q. Explain then the several clefs.

A. 1. This character  called the F clef, on the fourth line, has heretofore been used only in bass,  but is of late often used for the counter, for the purpose of bringing the  music in the staff.

2. This character,  called the G clef, is always used in the tenor and treble, and in modern  music often in the counter.

3. This character  is called the C clef, and only used in the counter.

Q. By what names or syllables are the seven sounds in music articulated?

A. By these four names—mi, fa, sol, la.

Q. How do you know by which of the names any note is to be called?

A. By first finding where mi, the center, or governing name, is to be found; when that is done, the places, including both lines and spaces, above that of the mi, are fa, sol, la, fa, sol, la (six places), then comes mi, and consequently the same musical letter again; and below the place of mi, descending, are la, sol, fa, la, sol, fa (six places), then mi, and the same musical letter again.

Q. As it appears, then, that mi is the governing name, and determines the names of all the others, pray tell me how you find the place of mi in any tune?

A. The natural place for mi, in all parts of music, is on that line or space, represented by B, but

If B be flat, mi is on - - - - - E	If F be sharp, mi is on - - - - - F
If B and E be flat, mi is on - - - - - A	If F and C be sharp, mi is on - - - - - C
If B E and A be flat, mi is on - - - - - D	If F C, and G be sharp, mi is on - - - - - G
If B, E, A and D be flat, mi is on - - - - - G	If F, C, G and D be sharp, mi is on - - - - - D

Q. But in modern written or printed music books, is there not an easier method of *mi, fa, sol, la*, than the one just mentioned?

A. There is: for music is now so written, that the name of each note is known by its shape—thus, a note when it is *mi*, is a diamond , when *fa*, a triangle , when *sol*, a round , and when *la*, a square  shape: see the

EXAMPLE.

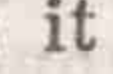

Q. How many are the musical notes, and what are their names?

A. There are six, viz: the Semibreve, Minim, Crotchet, Quaver, Semiquaver and Demisemiquaver.

The following scale will show, at one view, the *proportion* one note bears to another.

One Semibreve		is equal to
Two		Minims.
Four		Crotchets.
Eight		Quavers
Sixteen		Semiquavers.
Thirty-two		Demisemiquavers.

Q. Explain the above scale.

A. The Semibreve  is now the longest note used; it is white, without a stem, and is the measure note, and guides all the others.

The minim  is but half the length of the semibreve and has a stem to it

The Crotchet is but half the length of the minim, and has a black head and straight stem.

The quaver is but half the length of the crotchet, has a black head, and one turn to the stem, sometimes one way, and sometimes another.

The semiquaver is but half the length of the quaver, has also a black head and two turns to the stem, which are likewise various.

The Demisemiquaver is half the length of a semiquaver, has a black head, and three turns to its stem, also variously turned.

Q. What are rests?

A. All rests are marks of silence, which signify that you must keep silent so long a time as takes to sound the notes they represent, except the semibreve rest, which is called the bar rest, always filling the bar, let the mood of time be what it may.

THE RESTS.

Semibreve. Minim. Crotchet. Quaver. Semiquaver. Demisemiquaver.

Two Bars. Four Bars. Eight Bars

Q. Explain the rests?

A. The Semibreve or Bar rest is a black square underneath the third line.

The Minim rest is the same mark above the third line.

The Crotchet rest is something like an inverted figure of seven.

The Quaver rest resembles a right figure of seven.

The Semiquaver rest resembles the figure seven with an additional mark to the left.

The Demisemiquaver rest is like the last described, with a third mark to the left.

The two bar rest is a strong bar reaching only across the third space.

The four bar rest is a strong bar crossing the second and third space and third line.

The eight bar rest is two strong bars like the last described.

Q. Have the notes and rests always the same time?

No: Their time varies according to the several modes of time hereafter explained, yet they always bear the same proportion one to another.

Q. Are there not some marks which alter the length of the notes?

A. Yes, the dot • called point of addition, at the right hand of any note, makes it one half longer. See the example.

Also the figure three, over or under any three notes of the same kind shows that they must be sung in the time of two without a figure.

Likewise a hold ♯ over a note shows that it may be held one fourth longer than usual.

Q. What is a leger line?

A. A leger line is added when notes ascend or descend a line beyond the stave.

Q. What is a slur and its use?

A. A slur (∩) over or under a number of notes, or, if made quavers, semiquavers, &c., by joining their stems together, shows they are to be sung to one syllable.

Q. Explain the repeat.

A. The repeat • or :S: shows that the music is to be sung twice from it to the next double bar or close.

Q. Explain the use of figures 1, 2.

A. The figures 1, 2, at the end of a strain that is repeated, show that the note, or notes under 1, are to be sung before the repeat, and those under 2, after, omitting those under 1; but if tied with a slur, both are to be sounded at the repetition.

Q. What are meant by notes of Appoggiatura?

A. Small notes added to the regular notes, to guide the voice more easily and gracefully into the sound of the succeeding notes—these small notes are not to be named.

Q. Explain the use of the single bar.

A. The single  bar divides the time into equal parts according to the  measure note.

Q. Explain the use of the double bar.

The double bar  shows the end of a strain.

Q. The close.

A. The close  shows the end of a tune.

Q. What is meant by syncopation notes?

A. Syncopation notes, are those which are driven out of their proper order in the bar, or driven through it, and requires the beat to be performed while such notes are sounding. One or two examples follow, which, with the help of the skillful teacher, will soon be understood by singers of tolerable capacities.

THE TIME.

Q. How many moods of time are there in music?  
A. Nine: four of Common, three of Triple, and two of Compound.

Q. Explain the four MOODS OF COMMON TIME.

A. The first mood is known by a plain C, and has a semibreve or its quantity in a measure, sung in the time of four seconds—four beats in a bar, two down and two up.

1234 12 3 4 1234

dduu dd u u dduu

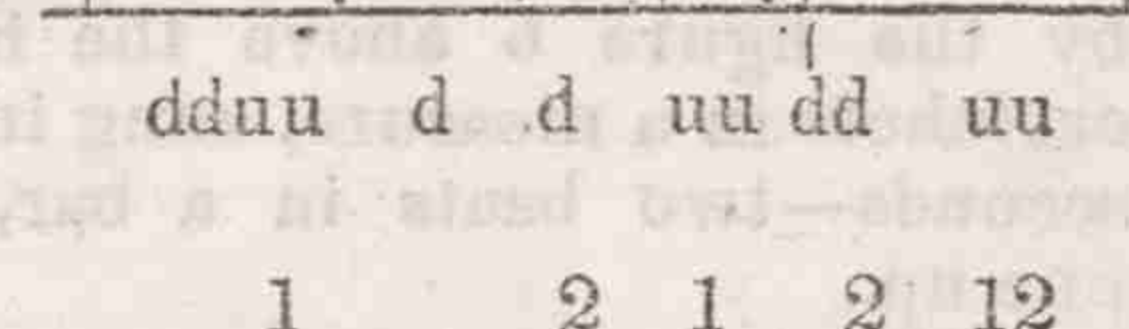

The second mood is known by a C with a bar through it, has the same measure, sung in the time of three seconds—four beats in a bar, two down and two up.

1234 1 2 34 12 34

dduu d d uu dd uu

The third mood is known by a C inverted, sometimes with a bar through it, has the same measure as the two first, sung in the time of two seconds—two beats in a bar.

1 2 1 2 12

d u d u du

12 1 2 1 2 12

The fourth mood is known by a figure 2 over a figure 4, has a minim for a measure note, sung in the time of one second—two beats in a bar, one down and the other up.

du d u d d du

Q. Explain the MOODS OF TRIPLE TIME.

A. The first mood of triple time is known by a figure 3 over a figure 2, has a pointed semibreve or three minims in a measure, sung in the time of three seconds—three beats, two down and one up.

1 2 3 1 2 3 123

ddu d d u ddu

The second mood is known by a figure 3 over a 4, has a pointed minim or three crotchets in a measure, and sung in two seconds—three beats in a bar, two down and one up.

1 2 3 1 2 3 123

d d u d d u ddu

The third mood is known by the figure 3 above figure 8, has three quavers in a measure, and sung in the time of one second—three beats in a bar, two down and one up.

1 2 3 12 3 123

d d u dd u ddu

Q. Explain the two MOODS OF COMPOUND TIME.

A. The first mood of compound time is known by the figure 6 above the figure 4, has six crotchets in a measure, sung in the time of two seconds—two beats in a bar, one down and one up.

1 2 1 2 1 2

d u d u d u

The second mood of compound time is known by the figure 6 above an 8, has six quavers in a measure, sung in the time of one second—two beats in a bar, one down and one up.

1 2 1 2 1 2

d u d u d u

Q. What do the figures over the bar, and the letters d and u under it, in the above examples of time, mean?

A. The figures show how many beats there are in each bar; and the letter d shows when the hand must go down, and the u, when up.

Q. What general rule is there for beating time?

A. That the hand fall at the beginning, and rise at the end of each bar, in all moods of time.

Q. Do you suppose those moods, when expressed by figures, have any particular signification, more than being mere arbitrary characters?

A. I think they have this significant meaning, that the lower figure shows how many parts or kinds of notes the semibreve is divided into, and the upper figure signifies how many of such notes or parts will fill a bar—for example, the first mood of compound time, (6 above 4,) shows the semibreve is divided into four

parts—i. e. into crotchets, (for four crotchets are equal to one semibreve); and the upper figure 6 shows that 6 of these parts, viz: crotchets, fill a bar. So of any other time expressed by figures.

Q. How shall we with sufficient exactness ascertain the proper time of each beat in the different moods?

A. By making use of a pendulum, the cord of which, from the center of the ball to the pin from which it is suspended, to be, for the several moods, of the following lengths:—

For the first and third Moods of Common Time, the first of Triple and first of Compound, (all requiring second beats),.....	39 2-10 inches.
For the second Mood of Common, second of Triple, and first of Compound,.....	22 1-10
For the fourth of Common,.....	12 4-10
For the third of Triple time,.....	5 1-21

Then for every swing or vibration of the ball, count one beat, accompanying the motion with the hand, until something of a habit is formed, for the several moods of time, according to the different lengths of the cord, as expressed above.

NOTE.—If teachers would fall upon this or some other method, for ascertaining and keeping the true time, there would not be so much difficulty among singers, taught at different schools, about timing music together; for it matters not how well individual singers may perform, if, when several of them perform together, they do not keep time well, they disgust, instead of pleasing their hearers.

Q. What is the use of a brace?

A. The brace links so many staves together as there are parts of the same tune written together.

Q. What are choosing notes?

A. Notes set immediately one after another on the same staff, either of which may be sung, but not both by the same voice. But where there are two or more singers, and choosing notes occur, some may take the upper, and others the lower notes, which increases the variety.

OF THE KEYS.

Q. What is meant by the keys in music, how many are there, and how are they known?

A. The key note of every correct piece of music is the leading note of the tune, by which all the other sounds throughout the tune are compared, and may always be found in the last bar of the bass, and generally of the tenor. If the last note in the bass be *la*, immediately below *mi*, the tune is on a flat or minor key; but if it be *fa*, immediately above *mi*, it is on a sharp or major key.

There are but two natural places for the keys—A and C. A is the place of the minor, and C the place of the major key. Without the aid of flats and sharps at the beginning of the staff, no tune can rightly be set to any other than these two natu-

ral keys; but by the help of these, *mi*, the center note, and of course the keys, are removed at pleasure, and form what are called artificial keys, producing the same effect as the two natural ones, i. e., by fixing the two semitones equally distant from the key notes. The difference between the major and minor keys is as follows: The major key note has its 3d, 6th, and 7th intervals, ascending, half a tone higher than the same intervals ascending from the minor key note. This is the reason why music set to the major key is generally sprightly and cheerful, whereas that set to the minor key is pensive and melancholy.

NOTE.—It is of the utmost importance that new beginners in music be taught the difference of the intervals when started from both keys, and this must be done by practice and imitation, for mere directions will not do.

# LESSONS FOR TUNING THE VOICE.

COMMON TIME, MAJOR KEY.

Musical notation for Common Time, Major Key. The first staff is in treble clef and the second in bass clef. Both start with a common time signature 'C'. The first measure of each staff contains three whole notes: C, E, G. The subsequent measures contain various rhythmic patterns of notes and rests, including quarter notes, eighth notes, and sixteenth notes, designed for voice tuning exercises.

COMMON TIME, MINOR KEY.

Musical notation for Common Time, Minor Key. The first staff is in treble clef and the second in bass clef. Both start with a common time signature 'C' and a key signature of one sharp (F#). The first measure of each staff contains three whole notes: C, E, G. The subsequent measures contain various rhythmic patterns of notes and rests, including quarter notes, eighth notes, and sixteenth notes, designed for voice tuning exercises.

TRIPLE TIME, MAJOR KEY.

Musical notation for Triple Time, Major Key. The first staff is in treble clef and the second in bass clef. Both start with a triple time signature '3/2' and a key signature of one sharp (F#). The first measure of each staff contains three whole notes: C, E, G. The subsequent measures contain various rhythmic patterns of notes and rests, including quarter notes, eighth notes, and sixteenth notes, designed for voice tuning exercises.

Musical notation for a final exercise in Treble Clef. The staff starts with a treble clef and a common time signature 'C'. The first measure contains three whole notes: C, E, G. The subsequent measures contain various rhythmic patterns of notes and rests, including quarter notes, eighth notes, and sixteenth notes, designed for voice tuning exercises.

LESSONS FOR TUNING THE VOICE.

The page contains ten staves of musical notation, organized into five pairs. Each pair consists of a vocal line and a piano accompaniment line. The vocal lines are written in treble clef with a key signature of one sharp (F#). The piano accompaniment lines are written in treble clef. The exercises are as follows:

- Exercise 1 (Staves 1-2):** The vocal line begins with a whole note chord of C4, E4, and G4. The piano accompaniment features a rhythmic pattern of eighth notes.
- Exercise 2 (Staves 3-4):** The vocal line begins with a whole note chord of C4, E4, and G4. The piano accompaniment features a rhythmic pattern of eighth notes.
- Exercise 3 (Staves 5-6):** The vocal line begins with a whole note chord of C4, E4, and G4. The piano accompaniment features a rhythmic pattern of eighth notes.
- Exercise 4 (Staves 7-8):** The vocal line begins with a whole note chord of C4, E4, and G4. The piano accompaniment features a rhythmic pattern of eighth notes.
- Exercise 5 (Staves 9-10):** The vocal line begins with a whole note chord of C4, E4, and G4. The piano accompaniment features a rhythmic pattern of eighth notes.

NOTE.—\* Ends over the next line of the accent, and 1 over the next.

The first four staves of music are arranged in a 2x2 grid. Each staff begins with a treble clef and a 3/2 time signature. The notation includes various note values (quarter, eighth, and sixteenth notes), rests, and accidentals. Above the notes, asterisks (\*) and half accents (∩) are placed to indicate specific intonation points. The music is divided into measures by vertical bar lines, with a double bar line appearing in the middle of each staff.

INTERVALS.

The last two staves of music are arranged vertically. Both staves begin with a treble clef and a key signature of one sharp (F#). The notation consists of a sequence of notes and rests, with asterisks (\*) and half accents (∩) placed above the notes to indicate intonation. The music is divided into measures by vertical bar lines, with a double bar line at the end of each staff.

NOTE.— \* Stands over the usual place of the accent, and ∩ over the half accent.

DEVOTION. L. M.

Sweet is the day of sacred rest; No mortal cares shall seize my breast.

O, may my heart in tune be found, Like David's harp of solemn sound.

UNION. C. M.

Lo, what an en-ter-tain-ing sight, Are brethren that a-gree, Brethren whose cheer-ful hearts u-nite In bands of harmony.

O thou in whose presence my soul takes delight, On whom in affliction I call; My comfort by day and my song in the night; My hope, my salvation, my all.

2 Where dost thou at noontide resort with thy sheep,  
To feed on the pastures of love?  
For why in the valley of death should I weep,  
Alone in the wilderness rove?

5 This is my beloved—his form is divine,  
His vestments shed odors around:  
The locks on his head are as grapes on the vine,  
When autumn with plenty is crowned.

8 His lips as a fountain of righteousness flow,  
That waters the garden of grace,  
From which their salvation the Gentiles shall know,  
And bask in the smiles of his face.

3 O why should I wander an alien from thee?  
Or cry in the desert for bread?  
My foes would rejoice when my sorrows they see,  
And smile at the tears I have shed.

6 The roses of Sharon, the lilies that grow  
In vales on the banks of the streams—  
His cheeks in the beauty of excellence blow,  
His eye all invitingly beams.

9 Love sits on his eyelids and scatters delight  
Through all the bright mansions on high—  
Their faces the cherubim veil in his sight,  
And tremble with fullness of joy.

4 Ye daughters of Zion, declare, have you seen  
The star that on Israel shone?  
Say if in your tents my beloved hath been,  
And where with his flock he hath gone.

7 His voice, as the sound of the dulcimer sweet,  
Is heard through the shadow of death,  
The cedars of Lebanon bow at his feet,  
The air is perfumed with his breath.

10 He looks, and ten thousands of angels rejoice,  
And myriads wait for his word—  
He speaks, and eternity, filled with his voice  
Re-echos the praise of her Lord.

WESLEY. C. M.

With inward pain my heart strings sound, My soul dissolves away, Dear sovereign whirl the

seasons round, And bring, :||: ||: And, bring, :||: ||: the promised day.

While beauty and youth are in their full prime, And folly and fashion affect our whole time; O let not the phantom our wishes engage,  
Let us live so in youth that we blush not in age.

2 The vain and the young may attend us awhile,  
But let not their flattery our prudence beguile;  
Let us covet those charms that shall never decay,  
Nor listen to all that deceivers can say.

3 I sigh not for beauty, nor languish for wealth,  
But grant me, kind Providence, virtue and health;  
Then richer than kings and far happier than they,  
My days shall pass swiftly and sweetly away.

4 For when age steals on me, and youth is no more,  
And the moralist time shakes his glass at my door;

What pleasure in beauty or wealth can I find,  
My beauty, my wealth, is a sweet peace of mind.

5 That peace I'll preserve it as pure as 'twas given,  
Shall last in my bosom an earnest of heaven;  
For virtue and wisdom can warm the cold scene,  
And sixty can flourish as gay as sixteen.

6 And when I the burden of life shall have borne,  
And death with his sickle shall cut the ripe corn,  
Re-ascend to my God without murmur or sigh,  
I'll bless the kind summons and lie down and die.

Awak'd by Sinai's awful sound, My soul in guilt and thrall I found, O'erwhelm'd in sin, with anguish slain, The sinner must be born again.

And knew not where to go. Or sink in endless woe.

2 Amazed I stood, but could not tell,  
Which way to shun the gates of hell,  
For death and hell drew near;  
I strove indeed, but strove in vain,  
The sinner must be born again,  
Still sounded in my ear.

3 When to the law I trembling fled,  
It pour'd its curses on my head,  
I no relief could find;  
This fearful truth increas'd my pain,  
The sinner must be born again,  
O'erwhelm'd my tortur'd mind.

4 Again did Sinai's thunder roll,  
And guilt lay heavy on my soul,  
A vast unwieldy load;  
Alas, I read and saw it plain,  
The sinner must be born again,  
Or drink the wrath of God.

5 The saints I heard with rapture tell,  
How Jesus conquered death and hell,  
And broke the fowler's snare;  
Yet when I found this truth remain,  
The sinner must be born again,  
I sunk in deep despair.

6 But while I thus in anguish lay,  
Jesus of Nazareth passed that way,  
And felt his pity move;  
The sinner by his justice slain,  
Now by his grace is born again,  
And sings redeeming love.

7 To heaven the joyful tidings flew,  
The angels tun'd their harps anew,  
And lofty notes did raise;  
All hail the lamb that once was slain,  
Unnumber'd millions born again,  
Still shout thy endless praise.

2 His name yields the richest perfume,  
 And sweeter than music his voice;  
 His presence disperses my gloom,  
 And makes all within me rejoice.  
 I should, were he always thus nigh,  
 Have nothing to wish or to fear—  
 No mortal so happy as I,  
 My summer would last all the year.

3 Content with beholding his face,  
 My all to his pleasure resigned,  
 No changes of season or place,  
 Would make any change in my mind:  
 While blessed with a sense of his love,  
 A palace a toy would appear,  
 And prisons would palaces prove,  
 If Jesus would dwell with me there.

4 Dear Lord, if indeed I am thine,  
 If thou art my sun and my song,  
 Say, why do I languish and pine?  
 And why are my winters so long?  
 O drive these dark clouds from my sky,  
 Thy soul cheering presence restore;  
 Or take me to thee upon high,  
 Where winter and clouds are no more.

Corydon's notes are all o'er, Now lonely he sleeps in the clay, His cheeks bloom with roses no more, Since death call'd his spirit away.

2. Sweet woodbines will rise round his feet,  
And willows their sorrowing wave;  
Young hyacinths freshen and bloom,  
While hawthorns encircle his grave.  
Each morn when the sun gilds the east,  
(The green grass bespangled with dew),  
He'll cast his bright beams on the west,  
To charm the sad Caroline's view.

3. O Corydon! hear the sad cries  
Of Caroline, plaintive and slow;  
O spirit! look down from the skies,  
And pity thy mourner below.  
'Tis Caroline's voice in the grove,  
Which Philomel hears on the plain,  
Then striving the mourner to soothe,  
With sympathy joins in her strain.

4. Ye shepherds so blithesome and young,  
Retire from your sports on the green,  
Since Corydon's deaf to my song,  
The wolves tear the lambs on the plain;  
Each swain round the forest will stray,  
And sorrowing hang down his head,  
His pipe then in symphony play  
Some dirge to sweet Corydon's shade.

5. And when the still night has unfurl'd  
Her robes o'er the hamlet around,  
Gray twilight retires from the world,  
And darkness encumbers the ground.  
I'll leave my own gloomy abode,  
To Corydon's urn will I fly,  
There kneeling will bless the just God  
Who dwells in bright mansions on high.

6. Since Corydon hears me no more,  
In gloom let the woodlands appear,  
Ye oceans be still of your roar,  
Let Autumn extend round the year;  
I'll hie me through meadow and lawn,  
There cull the bright flow'rets of May,  
Then rise on the wings of the morn,  
And waft my young spirit away.

The place it is hidden till it is reveal'd;  
The place is in Jesus, to Jesus we'll go,  
And there find redemption from sorrow and woe.

3 That place it is hidden by reason of sin;  
Alas! you can't see the sad state you are in;  
You're blind and polluted, in prison and pain,  
Oh, how can such rebels redemption obtain!

4 But if you are wounded and bruised by the fall,

## HIGHBRIDGE. L. M.

Through ev'ry age, eternal God, Thou art our rest, our safe abode; High was thy throne ere heav'n was made, Or earth thy humble footstool laid.

2 Long hast thou reign'd ere time began,  
Or dust was fashion'd into man;  
And long thy kingdom shall endure,  
When earth and time shall be no more.

3 But man, weak man, is born to die,  
Made up of guilt and vanity:  
Thy dreadful sentence, Lord, was just,  
"Return, ye sinners, to your dust."

4 Death, like an overflowing stream,  
Sweeps us away; our life 's a dream,  
An empty tale—a morning flow'r,  
Cut down and wither'd in an hour.

5 Teach us, O Lord, how frail is man,  
And kindly lengthen out his span,  
Till a wise career of piety  
Fits us to die and dwell with thee.

O Jesus, my Saviour, I know thou art mine, Of objects most pleasing, I love thee the best, Without thee I'm wretched, but with thee I'm blest.  
 For thee all the pleasures of sin I re - sign;

4 I find him in singing, I find him in pray'r,  
 In sweet meditation he always is near,  
 My constant companion, O may we ne'er part,  
 All glory to Jesus, he dwells in my heart.

2 Thy spirit first taught me to know I was blind,  
 Then taught me the way of salvation to find;  
 And when I was sinking in gloomy despair,  
 Thy mercy reliev'd me and bid me not fear.

3 In vain I attempt to describe what I feel,  
 The language of mortals or angels would fail;  
 My Jesus is precious, my soul 's in a flame,  
 I'm raised to a rapture while praising his name.

5 I love thee, my Saviour, I love thee, my Lord,  
 I love thy dear people, thy ways and thy word,  
 With tender emotion I love sinners too,  
 Since Jesus has died to redeem them from woe.

6 My Jesus is precious—I cannot forbear,  
 Though sinners despise me, his love to declare;  
 His love overwhelms me, had I wings I'd fly  
 To praise him in mansions prepar'd in the sky.

7 Then millions of ages my soul would employ,  
 In praising my Jesus, my love and my joy,  
 Without interruption, when all the glad throng  
 With pleasures unceasing unite in the song.

# ALL THINGS FAIR AND BRIGHT ARE THINE.

A DUETT, BY O. SHAW. ARRANGED FOR THE ORGAN OR PIANO FORTE.

SYM. ANDANTE AFFETTUOSO.

The first system of the score consists of two staves. The upper staff is in treble clef with a key signature of two flats (B-flat and E-flat) and a 3/4 time signature. It contains a melodic line with various note values, including eighth and sixteenth notes, and rests. The lower staff is in bass clef with the same key signature and time signature, providing a harmonic accompaniment with chords and single notes.

SECOND VOICE. TREBLE OR TENOR.

The second system features a single treble clef staff. It contains a melodic line for the second voice, with lyrics written below the notes. The key signature remains two flats and the time signature is 3/4.

Thou art, O God, the life and light Of all this won - drous world we see.

FIRST VOICE. TREBLE.

The third system features a single treble clef staff. It contains a melodic line for the first voice, with lyrics written below the notes. The key signature remains two flats and the time signature is 3/4.

The second system of the piano accompaniment consists of two staves. The upper staff is in treble clef with a key signature of two flats and a 3/4 time signature. It contains a melodic line with various note values, including eighth and sixteenth notes, and rests. The lower staff is in bass clef with the same key signature and time signature, providing a harmonic accompaniment with chords and single notes.

CRES.

The musical score consists of two systems. Each system has a vocal line (treble clef) and a piano accompaniment (grand staff with treble and bass clefs). The key signature has two flats (B-flat and E-flat). The first system includes a triplet of eighth notes. The second system includes a 'CRES.' (crescendo) marking. The lyrics are printed below the vocal line.

ALL THINGS FAIR AND BRIGHT ARE THINE. CONTINUED.

The musical score is arranged in two systems. The first system consists of two vocal staves (Soprano and Alto) and a piano accompaniment. The piano part is written in treble and bass clefs. The second system also consists of two vocal staves and a piano accompaniment. The piano part continues with a key signature change to one sharp (F#) and a tempo marking of *PIA.* (Piano). The lyrics are: "Where'er we turn thy glo - ries shine, And all things fair and bright are thine. Where'er we".

The musical score is written on a system of five staves. The top two staves are for the vocal line, and the bottom three are for the piano accompaniment. The key signature has two flats (B-flat and E-flat), and the time signature is common time (C). The score includes dynamic markings such as 'CRES.' (Crescendo), 'PIA.' (Piano), and 'MEZZO FORTE.' (Mezzo Forte). The lyrics are placed below the vocal staves. The piano part features arpeggiated chords and moving lines in both hands.

ALL THINGS FAIR AND BRIGHT ARE THINE. CONTINUED.

The first system of the musical score consists of four staves. The top two staves are vocal lines, and the bottom two are piano accompaniment. The music is in a key with two flats (B-flat and E-flat) and a common time signature. The vocal lines are marked with 'PIA.' and 'FOR.' above them. The piano accompaniment features a mix of chords and moving lines.

The second system of the musical score consists of four staves. The top two staves are vocal lines with lyrics, and the bottom two are piano accompaniment. The lyrics are 'bright are thine.' The music continues in the same key and time signature as the first system. The piano accompaniment includes a prominent chordal texture.

# THERE'S NOTHING TRUE BUT HEAVEN.

SYM. ANDANTE PASTORALE.

A SACRED SONG, BY O. SHAW. ARRANGED FOR THE ORGAN OR PIANO FORTE.

The first system of music consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. The time signature is 6/8. The music begins with a treble clef and a key signature of one flat (B-flat). The melody in the treble staff is composed of eighth and sixteenth notes, while the bass staff provides a simple harmonic accompaniment.

The second system continues the musical piece. It features more complex chordal textures in the treble staff, including some triplets and sixteenth-note patterns. The bass staff continues with a steady accompaniment.

This system includes the vocal line with lyrics. The lyrics are: "This world is all a fleet - ing show, For man's il - lu - sion given, This world is all a fleet - ing show for". The musical notation for the voice is written in a treble clef, with lyrics placed below the notes. The piano accompaniment continues in the two staves below.

THERE'S NOTHING TRUE BUT HEAVEN. CONTINUED.

man's il - lu - - sion giv'n, The smiles of joy, the tears of woe,

The first system of music features a vocal line on a single staff and a piano accompaniment on two staves. The vocal line includes a trill (tr) above the word 'joy' and a triplet (3) above the word 'tears'. The piano accompaniment consists of a treble and bass clef staff with various chords and melodic lines.

De - ceitful shine, de - - ceit - ful flow, There's

The second system of music continues the vocal line and piano accompaniment. The vocal line includes a trill (tr) above the word 'shine' and a triplet (3) above the word 'flow'. The piano accompaniment continues with similar musical textures.

## THERE'S NOTHING TRUE BUT HEAVEN. CONTINUED.

The musical score consists of three systems. The first system is a vocal line with lyrics: "no - thing true but heav'n, There's nothing true - - - but heav'n, There's nothing true - - - but heav'n." The second system is a piano accompaniment with a treble and bass clef. The third system is a symphony (SYM.) accompaniment, also with a treble and bass clef. The score includes various musical notations such as notes, rests, and dynamic markings like "DIM." and "SYM."

2 And false the light on glory's plume,  
 As fading hues of even;  
 And love, and hope, and beauty's bloom  
 Are blossoms gather'd for the tomb—  
 There's nothing bright but heav'n!

3 Poor wand'ers of a stormy day,  
 From wave to wave we're driv'n,  
 And fancy's flash and reason's ray,  
 Serve but to light the troubled way—  
 There's nothing calm but heav'n!

N. B. In singing the third line of the second verse, after applying the words "Are blossoms gather'd," to the fourth and fifth bars, from the double bar, untie the six semiquavers in the seventh bar and apply the whole of said third line to the sixth and seventh bars: and in singing the third line of the third verse, after applying the words "Serve but to light," to the fourth and fifth bars, apply the whole of said line to the sixth and seventh bars, in the same manner as directed for the third line of the second verse.
